

Patent
52478-5900REMARKS

The Office Action indicated that Claims 1-12 and 17-28 were allowed.

Applicant has amended independent Claim 13, which is directed to a mobile communication terminal with a plurality of antennas, a reception circuit and a transmission circuit capable of transmitting a transmission signal by using a directivity pattern formed in the reception of a signal received by the plurality of antennas, or an omnidirectional transmission signal.

Claim 13 has been amended to define the features of a transmission control means controlling the type of transmission signal consistent with the indicated allowed subject matter of Claims 17 and 21. Thus, Claims 13-16 are also believed to be allowable.

In view of this amendment, it is believed the case is now in condition for allowance and early notification of the same is requested.

If the Examiner believes a telephone interview will assist in the prosecution of this matter, the undersigned attorney can be contacted at the listed phone number.

I hereby certify that this correspondence is being transmitted via facsimile to the USPTO at 571-273-8300 on February 24, 2006.

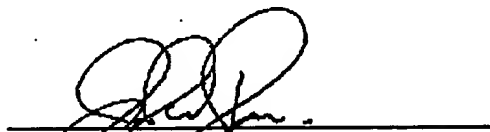

Very truly yours,

SNELL & WILMER L.L.P.
